### Define your problem statement

SKILL OR JOB RECOMMENDER APPLICATION

5 minutes

#### PROBLEM

Creation of a Job based recommendation system for job providers and job seekers using the candidate's skill set and recruiter's requirements by utilizing cloud platform

#### Key rules of brainstorming

To run a smooth and productive session

Stay in topic.

Encourage wild ideas.

Defer judgment.

Listen to others.

Go for volume.

If possible, be visual.

### Brainstorm

Write down any ideas that come to mind that address your problem statement.

10 minutes

#### TIP

You can select a sticky note and hit the pencil (switch to sketch) icon to start drawing!

job recommendation task, aiming to facilitate research and real world application design by utilizing cloudplatform

made publicly available new data set formed by set of job seekers profiles and set of job vacancies collected from different job search engine sites

carried out an evaluation to quantify empericaly the recommendation abilities of two state of the art methods , considering different configurations ,within the proposed framework

Doing a query based on keywords related to the job vacancy that he/she is looking for

put forward the proposal of a framework for job recommendation based on professional skills of job seekers

Creating and updating a pofessional profile,professional experience and professional skills.

### Group ideas

Take turns sharing your ideas while clustering similar or related notes as you go. In the last 10 minutes, give each cluster a sentence-like label. If a cluster is bigger than six sticky notes, try and see if you and break it up into smaller sub-groups.

20 minutes

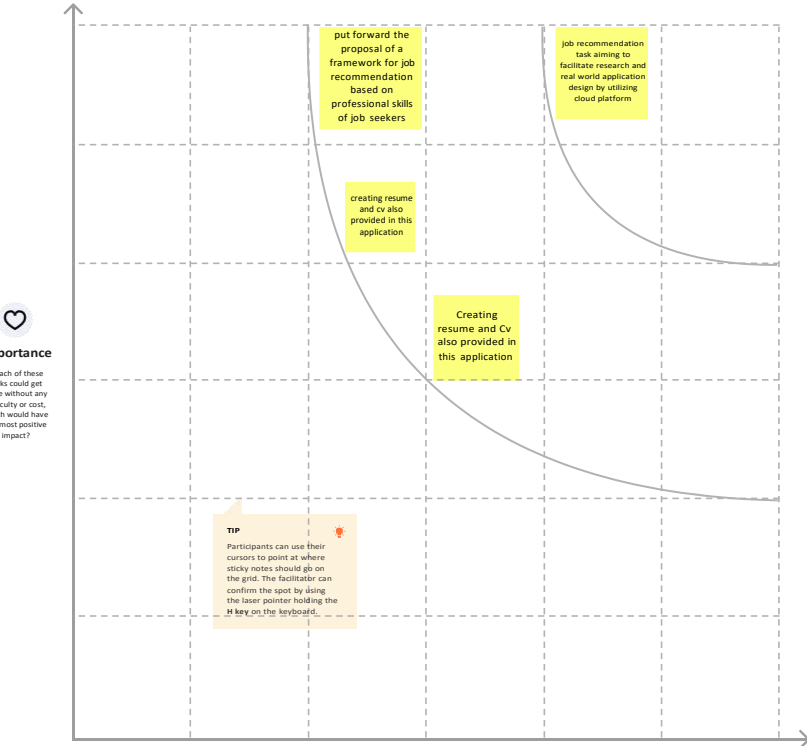

The Internet-based recruiting platforms become a primary recruitment channel in most companies. While such platforms decrease the recruitment time and advertisement cost, they suffer from an inappropriateness of traditional information retrieval techniques like the Boolean search methods. Consequently, a vast amount of candidates missed the opportunity of recruiting. The recommender system technology aims to help users in finding items that match their personnel interests; it has a successful usage in e-commerce applications to deal with problems related to information overload efficiently. In order to improve the e-recruiting functionality, many recommender system approaches have been proposed. This article will present a survey of e-recruiting process and existing recommendation approaches for building personalized recommender systems for candidates/ job matching.

### Prioritize

Your team should all be on the same page about what's important moving forward. Place your ideas on this grid to determine which ideas are important and which are feasible.

20 minutes

#### Importance

If each of these tasks could get done without any difficulty or cost, which would have the most positive impact?

#### Feasibility

Regardless of their importance, which tasks are more feasible than others? (Cost, time, effort, complexity, etc.)
