

Solution Architecture

Project Design Phase - I

Date	10 October 2022
Team ID	PNT2022TMID14513
Project Name	Skill/ Job Recommender application
Maximum Marks	4 Marks

Solution Architecture:

To develop an end-to-end web application capable of displaying the current job openings based on the user skillset. The user and their information are stored in the Database. An alert is sent when there is an opening based on the user skillset. Users will interact with the chatbot and can get the recommendations based on their skills. We can use a job search API to get the current job openings in the market which will fetch the data directly from the webpage.
